

TransitOps - UX App Flow Document

Goal: Define every screen, navigation path, user action, button behavior, success state, error state, and empty state required for the MVP.

All Screens

0. Login

Purpose: Login with Email, Password and Role.

Actions: Sign In → Dashboard (role-based). Forgot Password opens reset page.

States: Success: Logged in. Error: Invalid credentials / Account locked. Empty: Empty form.

1. Dashboard

Purpose: View KPIs, recent trips and fleet status.

Actions: Sidebar navigation to all modules. Filters update dashboard.

States: Success: KPIs loaded. Error: Failed API. Empty: No operational data.

2. Vehicle Registry

Purpose: Manage vehicles.

Actions: Add Vehicle, Edit, Delete, Search, Filter.

States: Success: Vehicle saved. Error: Duplicate registration / Invalid data. Empty: No vehicles.

3. Drivers

Purpose: Manage driver profiles.

Actions: Add Driver, Edit, Suspend, Search.

States: Success: Driver updated. Error: Expired license / Duplicate license. Empty: No drivers.

4. Trip Dispatcher

Purpose: Create and manage trips.

Actions: Select source, destination, vehicle, driver, cargo, dispatch.

States: Success: Trip dispatched/completed. Error: Capacity exceeded, unavailable vehicle/driver, expired license. Empty: No trips.

5. Maintenance

Purpose: Log maintenance records.

Actions: Save maintenance, Close maintenance.

States: Success: Vehicle marked In Shop / Available. Error: Invalid vehicle. Empty: No maintenance logs.

6. Fuel & Expenses

Purpose: Record fuel and expenses.

Actions: Add Fuel, Add Expense.

States: Success: Cost updated. Error: Invalid amount. Empty: No records.

7. Analytics

Purpose: View reports and KPIs.

Actions: CSV Export.

States: Success: Report generated. Error: Export failed. Empty: No analytics.

8. Settings

Purpose: Manage organization settings and RBAC.

Actions: Save Changes.

States: Success: Settings updated. Error: Validation failed. Empty: Default settings.

User Journey

Login → Dashboard → (Vehicle & Driver Setup if first use) → Create Trip → Dispatch Trip → Complete Trip → Log Fuel/Expenses → Maintenance (if required) → Analytics → Logout

Navigation Flow

Sidebar Navigation: Dashboard ↔ Fleet ↔ Drivers ↔ Trips ↔ Maintenance ↔ Fuel & Expenses ↔ Analytics ↔ Settings. Logo returns to Dashboard. Logout returns to Login.

Button Actions

Sign In → Authenticate user. Add Vehicle → Open form & save vehicle. Add Driver → Register driver. Dispatch → Validate rules then dispatch. Complete → Finish trip & update statuses. Cancel → Restore statuses. Save Maintenance → Mark vehicle In Shop. Close Maintenance → Restore vehicle. Add Fuel / Add Expense → Save record. Export CSV → Download analytics. Save Changes → Persist settings.

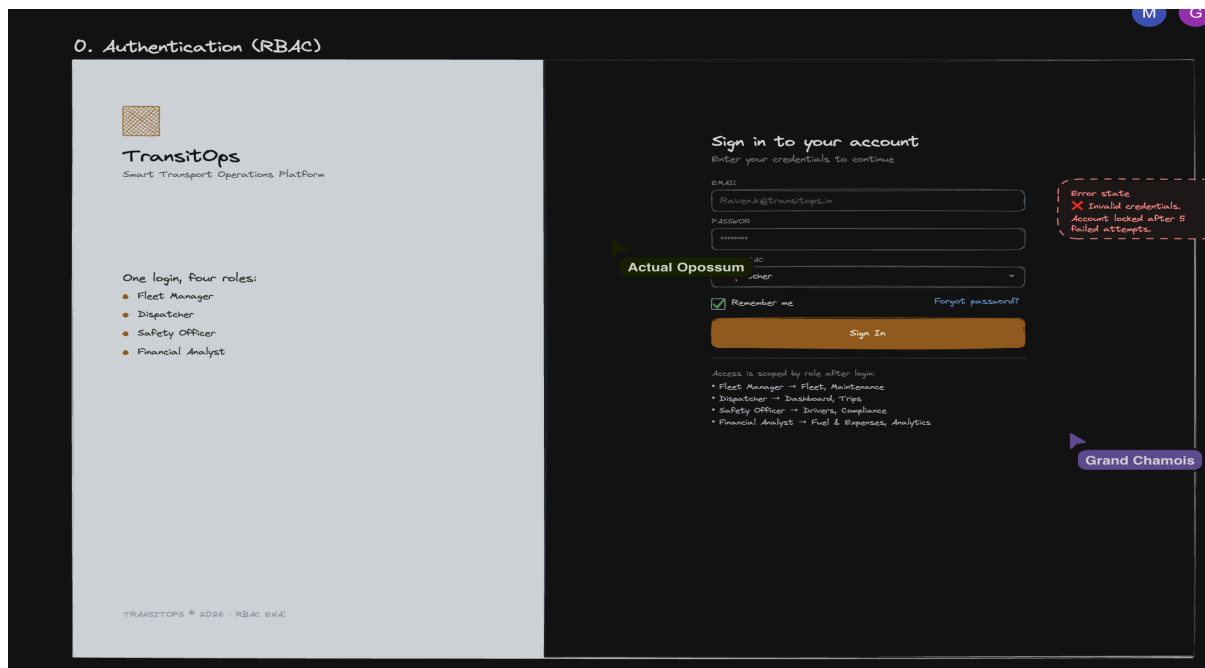

Login Flow

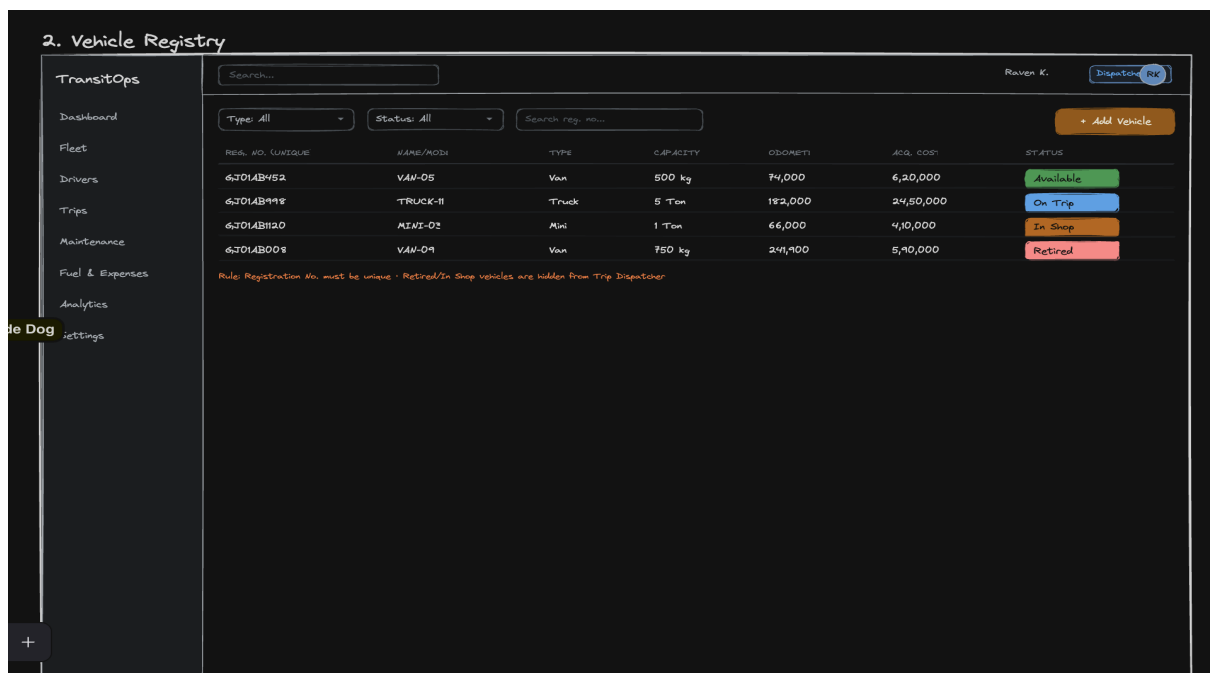

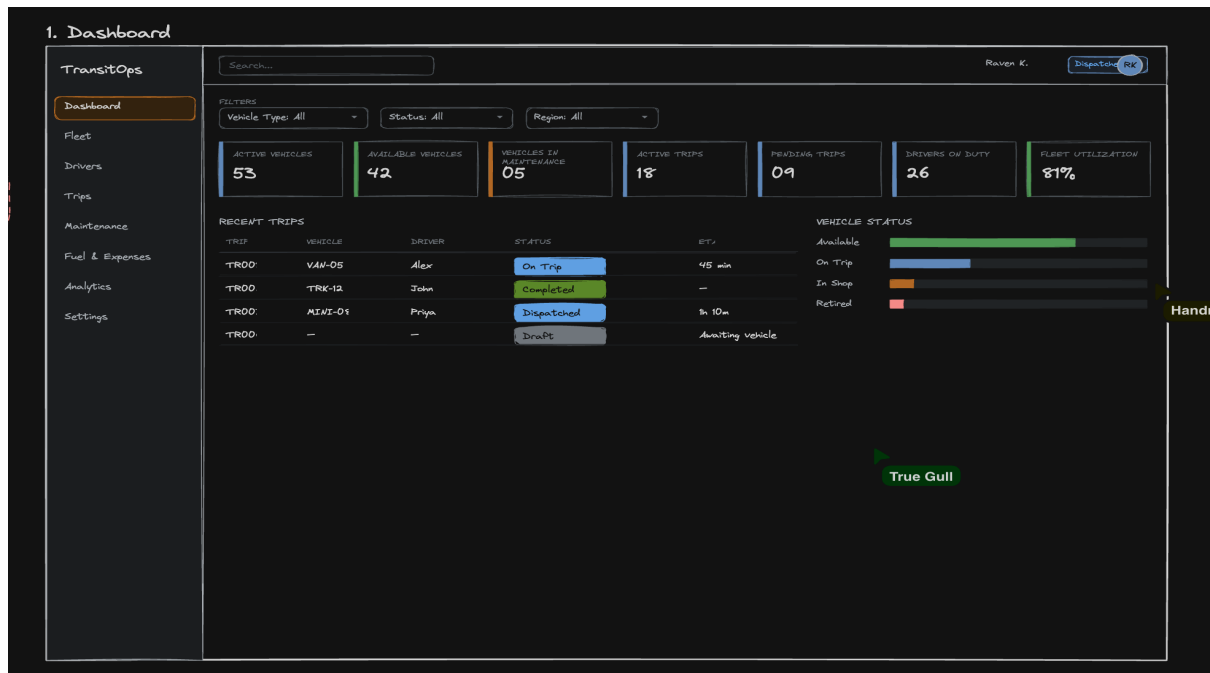

Enter Email + Password + Role → Validate credentials → JWT issued → Redirect to role-specific dashboard. Invalid credentials show inline error. Unauthorized users cannot access protected routes.

Business Validation States

- Duplicate Vehicle Registration → Error.
- Cargo exceeds capacity → Dispatch blocked.
- Vehicle In Shop/Retired → Hidden from dispatch.
- Driver Suspended/Expired License → Assignment blocked.
- On Trip driver/vehicle cannot be reassigned.
