

TransitOps - Product Requirements Document (PRD)

App Name

TransitOps - Smart Transport Operations Platform

One-line App Idea

A centralized fleet management platform that digitizes vehicle, driver, dispatch, maintenance, fuel, and expense operations while enforcing business rules through Role-Based Access Control (RBAC).

Target Users

- Fleet Manager - Manages fleet assets, maintenance, and vehicle lifecycle.
- Dispatcher - Creates trips, assigns vehicles and drivers, and monitors deliveries.
- Safety Officer - Tracks driver compliance, license validity, and safety scores.
- Financial Analyst - Monitors fuel costs, maintenance expenses, and profitability.

Problem You Are Solving

Logistics companies often rely on spreadsheets and manual logbooks, leading to scheduling conflicts, underutilized vehicles, missed maintenance, expired licenses, inaccurate expense tracking, and poor operational visibility. TransitOps centralizes all transport operations into one platform with automated validations and real-time insights.

Main Features

1. Secure Authentication with RBAC
2. KPI Dashboard
3. Vehicle Registry (CRUD)
4. Driver Management (CRUD)
5. Trip Dispatch & Lifecycle Management
6. Maintenance Management
7. Fuel & Expense Tracking
8. Reports & Analytics (Fuel Efficiency, Fleet Utilization, ROI)

User Roles

- Fleet Manager - Fleet & maintenance management
- Dispatcher - Trip planning and dispatch
- Safety Officer - Driver compliance monitoring
- Financial Analyst - Operational cost and analytics

User Stories

- As a Fleet Manager, I want to register and manage vehicles.
- As a Dispatcher, I want to assign only available vehicles and drivers.
- As a Safety Officer, I want to block drivers with expired licenses or suspended status.
- As a Financial Analyst, I want to track fuel, maintenance costs, and operational ROI.

Success Metrics

- 100% enforcement of mandatory business rules.
- Successful vehicle, driver, trip, and maintenance CRUD.

- Automatic status transitions work correctly.
- Accurate KPI dashboard and analytics.
- Role-based access functions correctly.

MVP Scope

- Authentication & RBAC
- Dashboard with KPIs
- Vehicle Registry
- Driver Management
- Trip Management with validations
- Maintenance Workflow
- Fuel & Expense Tracking
- Reports & Analytics

Features Not Included in Version 1

- Live GPS Tracking
- AI Route Optimization
- Predictive Maintenance
- Mobile Application
- Multi-company Support
- Push Notifications
- IoT Integration
- Payroll & HR Modules
- Inventory Management
