

TransitOps - UI/UX Design Brief

1. Design Style

Modern Enterprise SaaS dashboard inspired by Stripe, Linear, Vercel, Notion and Plane.so. Minimal, clean, data-first, professional, spacious layouts with subtle shadows and rounded corners.

2. Overall User Experience

Enable users to locate information within seconds, create trips quickly, understand fleet health at a glance, and navigate with minimal cognitive load. Prioritize clarity, consistency, and predictable interactions.

3. Color Palette

Primary: #2563EB (Blue)

Background: #F8FAFC

Surface: #FFFFFF

Border: #E2E8F0

Primary Text: #0F172A

Secondary Text: #64748B

Success: #22C55E Warning: #F59E0B Danger: #EF4444

4. Typography

Primary Font: Inter (Fallback: System UI). Headings: 700 weight. Body: 400. Buttons: 600. Sizes: 36px page title, 24px section title, 18px card title, 16px body, 14px table, 12px captions.

5. Component Style

Use shadcn/ui components. Buttons with 12px radius, 44px height, soft hover animations. Cards with 16px radius, light borders, soft shadows and 24px padding. Tables include sticky headers, search, filters and pagination. Inputs feature rounded borders and blue focus rings.

6. Layout Rules

Fixed left sidebar (260px), top navigation bar with search/profile, 12-column responsive grid, 32px page padding, 24px spacing between components. Desktop uses two-column forms while mobile uses a single-column layout.

7. Dashboard Design Direction

Top KPI cards (Active Vehicles, Available Vehicles, Active Trips, Fleet Utilization), followed by charts (Fuel Consumption, Fleet ROI, Monthly Costs), Recent Trips table and Recent Maintenance activity.

8. Mobile/Desktop Behavior

Desktop: Persistent sidebar, multi-column layouts. Tablet: Collapsible sidebar and stacked charts. Mobile: Hamburger menu, stacked cards, horizontal table scrolling, floating action button for quick creation.

9. Button & Card Style

Primary buttons use solid blue backgrounds with white text. Secondary buttons are outlined. Danger buttons use red. Cards contain an icon, title, value, trend indicator and subtle hover elevation.

10. Inspiration References

Linear, Stripe Dashboard, Vercel Dashboard, Notion, Plane.so, Attio CRM, Clerk Dashboard, shadcn/ui, Aceternity UI, Magic UI.

11. Accessibility & UX Principles

Maintain WCAG AA contrast, keyboard navigation, visible focus states, skeleton loading screens, friendly error messages, meaningful empty states, responsive layouts, and consistent navigation across all modules.
